Fontaine Parts Connection Introduces New Combined Catalog

Irondale, Ala. (July 16, 2008) – Fontaine Parts Connection introduces a new, full-color parts and service catalog. In addition to covering the complete line of Genuine Fontaine Parts for Fontaine fifth wheels, the new catalog also includes maintenance information.

The 20-page catalog brings together materials that had previously been spread among nearly 100 pages in multiple parts and schematics brochures.

“With this combined parts and service catalog, we have created a universal resource that is more user-friendly and informative for both service and parts personnel,” explains Toby Harris, vice president of sales and marketing for Fontaine Parts Connection.

The catalog has been reconfigured to make it more convenient for customers to find the parts they need for their fifth wheels by simply stepping through the type of fifth wheel they are working on, rather than poring over lists of part numbers. Parts are arranged in kits, which are color-coded in illustrations for easy identification and ordering.

Also in the catalog are step-by-step No-Slack[®] fifth-wheel preventive maintenance procedures and jaw and wedge adjustment instructions; frequently asked questions; and troubleshooting flow charts.

The free Fontaine Parts Connection catalog is available for download at www.fifthwheel.com. To order a printed copy, visit the Web site or call (800) 874-9780.
